

# Quick Guide

With LiveTeam application you can:

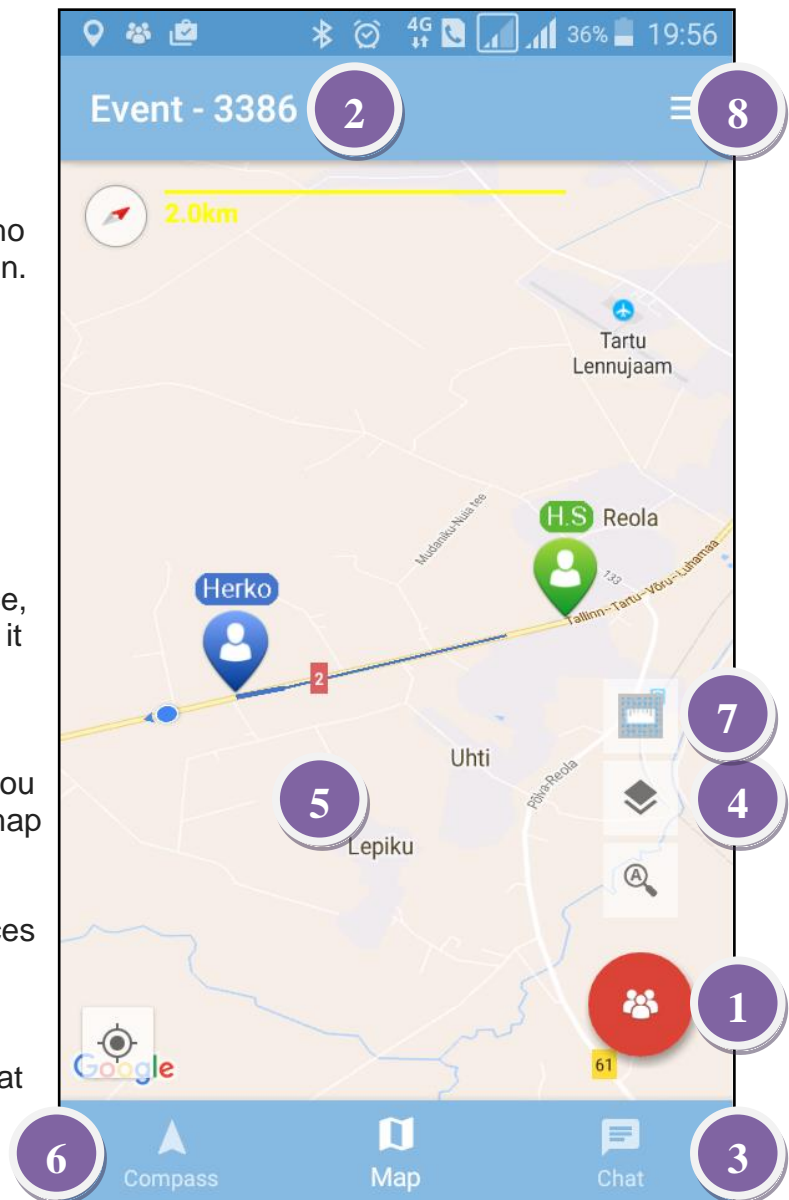

- follow your friends and teammates on live and communicate with them.
- create your own map and view events plans

## How to use app

1. Download the LiveTeam on your smartphone for free – you can find it in your App Stores and Google Plays by searching „LiveTeam“
2. When first using app, you will need to enter your phone number, name, e-mail and choose suitable icon for yourself.

## 10 tips how to use LiveTeam:

1. To share events with your friends and teammates, create „**Event**“ (red button) and you will receive unique code.
2. **Share your code** with others and they can join you in your event. Everyone who joins the event can be seen on map than.
3. To share information during the Event you can use **Chat**
4. **Touching map icon** you can choose different map layers on Google and Estonian terrain map.
5. **Long touch on screen** opens up choice, where you can save the location, share it with others or set as your destination to arrive.
6. Using **compass** you can move where you need to. Mark the destination on your map and follow the compass arrow.
7. **Ruler** helps you to measure the distances between locations
8. On **menu** you can set the interval how often data is set and received. Doing that you can save battery for longer.
9. New public event plans are constantly being updated on you map.
10. Touch map on your screen and it widens even more.

**NB!** Turn on GPS and mobile data on your phone – this way you can see your own and your friends location on your phone and any publicly shared information about the different objects!
